

Solar Screens

# ■ ■ ■ Universal

Few things in this world are truly universal. This is one of them. It blocks both the wind and the sun for dual protection. Used outside, it blocks the wind, allowing you to enjoy the cooler months. The best part is that it blocks the sun's UV Rays before they enter your interior. Not only does it allow for climate control but it also saves on energy costs. . Now, we know what you're thinking, and the answer is yes. The Universal awning looks amazing. It is a high-functioning design element, thanks to its compact construction and elegant box.

Let's talk options. Universal awnings can be installed on walls or ceilings, and all models use the same technology. Operating your Universal can be manually by gear and crank or automatically by electric motor. We can link several units together to operate as one. With a wide array of fabrics, the Universal solar screen provides so many options that someone might call it, well, universal.
